PROJECTS

To Do List

Creator

- This Todo List mini project aims to practice your "Vanilla JS" skills!
- I have taken HTML, CSS and JavaScript help to create this Todo List. html and css helped to design it and JavaScript made it work.
- **JavaScript Todo List** helps you create a list of things you want to do throughout the day. Suppose you want to do something throughout the day that you can list here. Whenever you complete that task then you can delete it.

Tip Calculator

Creator

- This Calculator mini project aims to practice your "HTML CSS JAVASCRIPT" skills!
  this was majority use for improving my HTML and CSS skills

- it can do basic calculation like addition ,subtraction ,multiplication ,divide this is my first project
- GitHub link :- https://github.com/Aayush343/calculator

Random-Quote-Generator

Creator

- In this project, you'll create an app that displays random famous quotes each time a button is clicked. You can display a quote from a famous athlete, politician, or historical figure:
- "The only thing we have to fear is fear itself." — Franklin Delano Roosevelt.
  You'll need to use your knowledge of basic JavaScript syntax, including variables, loops and object literals, to complete this project.
- This project is a fun and effective way for you to practice fundamental JavaScript skills. It also gives you a simple interactive portfolio piece to show off your understanding of JavaScript.
